From Aspiration to Achievement: A Comprehensive Range of PREMIUM TRAINING PROGRAM

What is Proceum under Premium Training Program(PTP)?

Proceum is an umbrella portal encompassing everything related to health under its wings. Proceum has a very strong vision to connect an individual to every direct and indirect entity related to health thus making him central to the entire healthcare system.

Proceum is the catalyst that has made an individual the principal character in the healthcare system. Over a period of time it will change the way anything related to health will be discussed and acted upon.

Proceum is a world within a world. A virtual world, where everything and every one of the real world entities, related to health, are interconnected through an information gateway. This gateway is not only linking, directly and indirectly, all the players in the health sector but is one of the strongest catalyst to improve the quality of life substantially.

Why Premium Training Program(PTP) has PROCEUM?

Repository of High Definition Images, Illustrations, 2D & 3D Animations

Proceum continuously produces an anatomically accurate repository of high-definition images, illustrations, and 2D & 3D Animations for medical e-content. This qualitatively superior medical e-content has multiple uses across various educational and industrial platforms.

Detailed Video Lectures for all the MBBS subjects.

Under production, these video lectures are a great support for first to fourth-year students studying MBBS.

High-yield video Lectures for Various Licensing Examinations

Under production, these video lectures concentrate more on case discussions rather than on a didactic way of teaching.

Exhaustive Q-banks with Explanations for Various Licensing Examinations

Feature-rich Q-banks are a great source of support for students appearing for multiple licensing examinations.

Features of PROCEUM?

Learning Management System

Professionally developed LMS for medical institutions with remarkable resources (unparalleled repository of high-resolution images, 2D & 3D animations), flexibility, and reach. An excellent product that will enhance student engagement and help them to have a higher understanding of subjects. Coupled with Flash Cards with high-yield points, the faculty will be able to deliver lectures of greater caliber with appreciable accuracy.

HD Video Lectures

Combination of accurate content, high-resolution images, and 2D & 3D animations, our high definition Video Lectures emphasize on retention of knowledge and concepts. With high production

value, our video lectures are appropriately short to ensure that students are not overtaxed by cognitive aspects

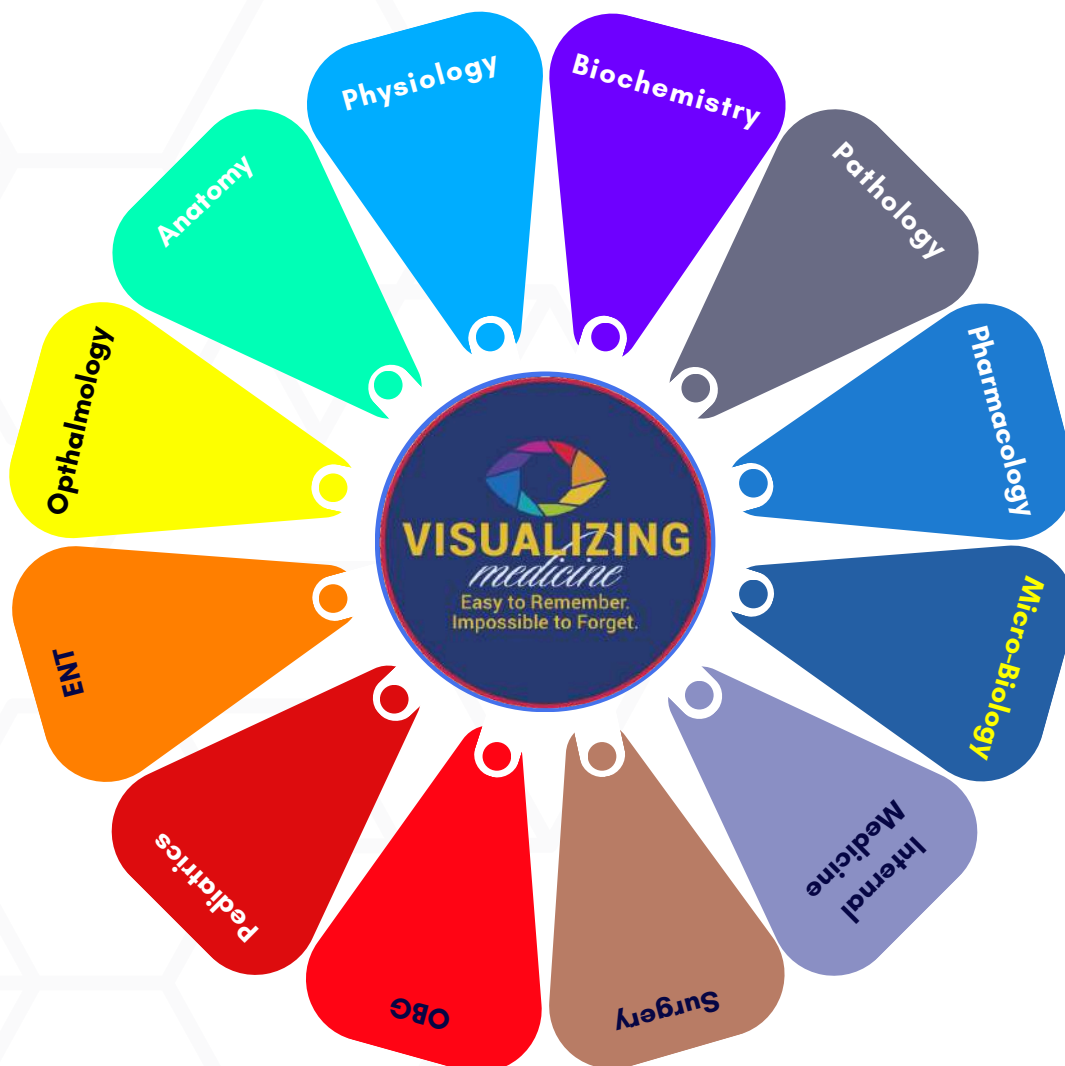

Question Banks with Explanatory Answers

Enhancing the chances of successfully clearing any medical licensing exam, our Questions Banks have questions based on our finer and exhaustive understanding of various exam patterns. Our question banks provide applicative and relevant explanations about the right answer, detailed performance reviews, and progress charts apart from customized assessments from expert faculty, wherever and whenever necessary.

High Yield Lecture Notes

Our high-yield lecture notes are a qualitative reflection of our lucid understanding of examination patterns and the approach needed to crack them successfully. They cover critical lecture points with a high degree of sequencing, accuracy, clarity, and legibility. We make them beneficial to the learner by emphasizing greater processing of information as well as strengthening high and longer retention of content at the same time. This helps in improving learning results.

What is McGrawHill under Premium Training Program(PTP)?

McGraw Hill was founded in 1888, when James H. McGraw, co-founder of McGraw Hill, purchased the American Journal of Railway Appliances.

It is one of the "big three" educational publishers along with Houghton Mifflin Harcourt and Pearson Education.

Expanding its leadership and experience of a massive 136 years in the education category, McGraw Hill provides two new digital platforms to help medical professionals and students easily access trusted content that evolves and updates as medicine changes, as well as study tools that personalize the learning experience to help them succeed.

"Medical students and clinicians for decades have trusted McGraw Hill as a provider of authoritative content and up-to-date reference materials that help them treat patients and prepare for exams," said Scott Grillo, President of McGraw Hill's Global Professional group. "

The Access mobile app complement McGraw Hill's suite of **digital subscription services** and **platforms for medical education** that includes **AccessMedicine**, which has a **20-year legacy of serving medical students with trusted content from the best minds in medicine**, and **Boards & Beyond**, a provider of on-demand **medical education video libraries** and **comprehensive online resources** acquired by McGraw Hill.

- **Easy access to trusted content.**

Learners can easily access gold-standard content that their institutions have subscribed to and search across McGraw Hill's Access products, including AccessMedicine, AccessPharmacy, AccessEmergency Medicine and more, from a single place.

- **Personalization to help students learn and save time.**

Through a personal dashboard, learners can quickly find book chapters, videos, images, figures, infographics, podcasts, review questions and other content they need based on their preferences, and curate their own personal library.

GLOBAL MED STUDY

- **Access to what learners need in whatever situation they're in.**

With the Access app, learners can save content for offline viewing later. Learners can also use one profile to access either the app or the web.

- **A comprehensive collection of study and reference material** that covers an array of foundational pre-clinical, clinical, and clinical-reasoning topics.
- **Quick-hit practice questions** that help students prepare for board exams like FMGE, USMLE and others.
- **Features that enable students to organize how they study**, like advanced notetaking, highlighting, search and audio reading.
- **Student-to-student** guides written and contributed by students.

600 +

Infographics

Access Medicine offers a collection of over 600 one-page medical infographics that are high-yield summaries to serve as a point of entry into core foundational content.

37,000 +

Q & As

boasts a comprehensive test prep and self-assessment tool that features Harrison's Self-Assessment and Board Review, Graber and Wilbur's Family Medicine Examination & Board Review, and the LANGE collection of titles.

1,350 +

Cases

developed using real-world scenarios help learners think critically and master clinical application of knowledge. Includes selections from our Case Files series and the Vanderbilt Internal Medicine and Pediatrics Curriculum (VIMPC).

130 +

Podcasts

that focus on core clinical topics and board review accompanying AccessMedicine's core resources. The platform boasts podcasts from Run The List, Harrison's Podclass and Symptom to Diagnosis (S2D).

**Interactive
Anatomy Modules**

300+ Interactive Human Anatomy Modules, Focused anatomy tours, interactive anatomy quizzes and full 3-D interactive anatomy modules.

**Ascultation
